

Select Charleswater Test Equipment to Fulfill the Requirements of EN 61340-5-1 Paragraph 5.3.6

"Once the [ESD protected area] is constructed or modified, the ESD coordinator shall audit the facility to confirm that the requirements are met. A list and location of all EPA equipment shall be prepared and maintained." Test equipment shall be selected to make measurements of appropriate properties of the technical requirements that are incorporated into the ESD programme plan. Charleswater Testers and Monitors verify the proper functioning of items that provide ESD protection.

DESCO EMIT SmartLog X3

- Three tests at same time; depress contact once to test footwear independently and wrist strap
- Dual Independent Footwear and Wrist Strap Tester with latest automated logging
- Paperless data can enhance operator accountability immediately, identifying problems while reducing logging and auditing costs
- No need to dedicate a computer
- All required components included in system
- Made in America Superior quality

50434

Combo Tester

- Dual test circuits Versatile, tests footwear and wrist straps
- Positive rocker switch actuation Reliably changes test mode
- Red light and audible alarm Indicates that circuit resistance is too high or too low
- Battery powered with low battery indicator Provides early warning to replace battery
- Wrist strap range: 750 kilohms - 35 megohm Footground range: 750 kilohms - 35 megohms
- Made in America Superior quality

99000

99065 220V AC Adapter Available for use with 99000 Combo Tester

DESCO EMIT Static Locator

- Effective problem solving tool Can be attached to the 50628 Ionising Air Gun
- Auto-ranging Easy to use and operate, no adjustments
- LCD display is easy to read No interpretation necessary
- Allows user to find static fields Eliminate them rapidly with the Ionising Air Gun and verify that the static has been eliminated
- No power necessary Utilizes power source from Ionising Air Gun
- No calibration necessary
- Made in America Superior quality

50629

DESCO EMIT Dual Independent Footwear and Wrist Strap Tester

- Wrist Strap and Footwear testing
- Split footplate design
- Independent alarming conditions
- Relay time for door locking systems
- Tests either single or dual wrist strap
- RS 485 Standard Connection
- Made in America Superior quality

50406 Split Footplate

50413

DESCO EMIT Dual Independent Footwear Tester

- Footwear testing
- Split footplate design
- Independent alarming conditions
- Relay time for door locking systems
- RS 485 Standard Connection
- Made in America Superior quality

50406 Split Footplate

50412

DESCO EMIT Limit Comparator for Testers

- Resistance limits set to specific values Use to calibrate tester by verifying resistance range
- Selector knob to select resistance Quickly and accurately able to change ranges
- Six ranges: 10 Kilohms, 100 Kilohms, 1 Megohm, 10 Megohms, 35 Megohms, 100 Megohms, and 1 Gigohm Versatile tool; able to handle all ranges whether for Foot Grounders, Wrist Straps, or ESD Shoes
- Calibrates 50412, 50413, and 50434
- Made in America Superior quality

50401

Calibration Unit (Testers)

- Calibrates Item 99000 Combo Tester
- Simple operation Designed for both wristband and footground tester calibration
- Passive unit Requires no power source
- Made in America Superior quality

99090
